

### Features

- Dimmable by ordinary switch with using simple procedure
- Designed on the basis of patented **FlexDigit®** technology
- Range of dimming **2-100%**
- Unlimited number of switching cycles
- **Reliable start at each level of lighting**
- **Constant light level for the mains voltage range 207-253VAC**
- High luminous efficacy **66 Lm/W**
- Wide ambient temperature **-10°C do +50°C** on the maximum brightness
- **Long lifetime over 16000** burning hours
- **Colour temperature 2700°K**

### Dimming procedure

1. Turn on the lamp
2. Next turn off and turn on quickly (within 1 sec). Now the lamp brights up and down smoothly.
3. Turn off the lamp at your desire level of lighting. This level of brightness is stored by the lamp
4. The lamp turns on at the stored light level at next turning on the lamp.
5. To change the level of lighting you must repeat the procedure presented above.

### Technical Data

Power W	Input line currant	Power factor	THD	Colour Rendering Index Ra	Colour temperature	Luminous flux	Luminous efficacy Lm/W	Base E27	Dimensions [mm]
